

How JOPI maintenance management will increase your company income

**How you will get more and better
results with less money consumed**

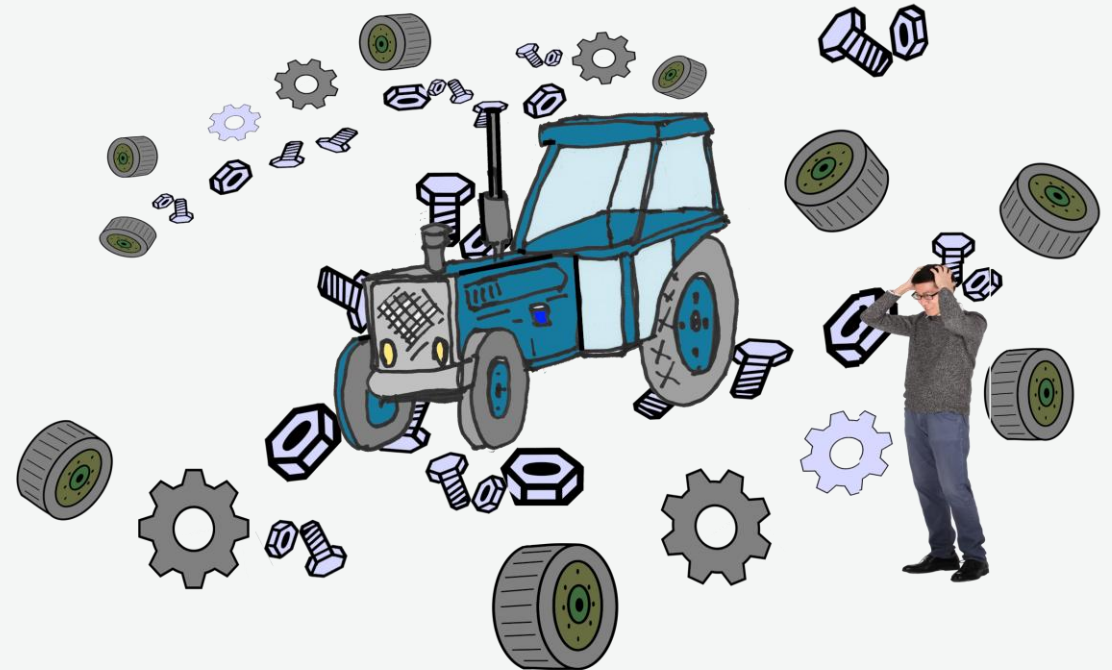

With JOPI you will avoid situations like this

Sixteen trains,
value about 300 M€,
completely destroyed
due to wrong documents used

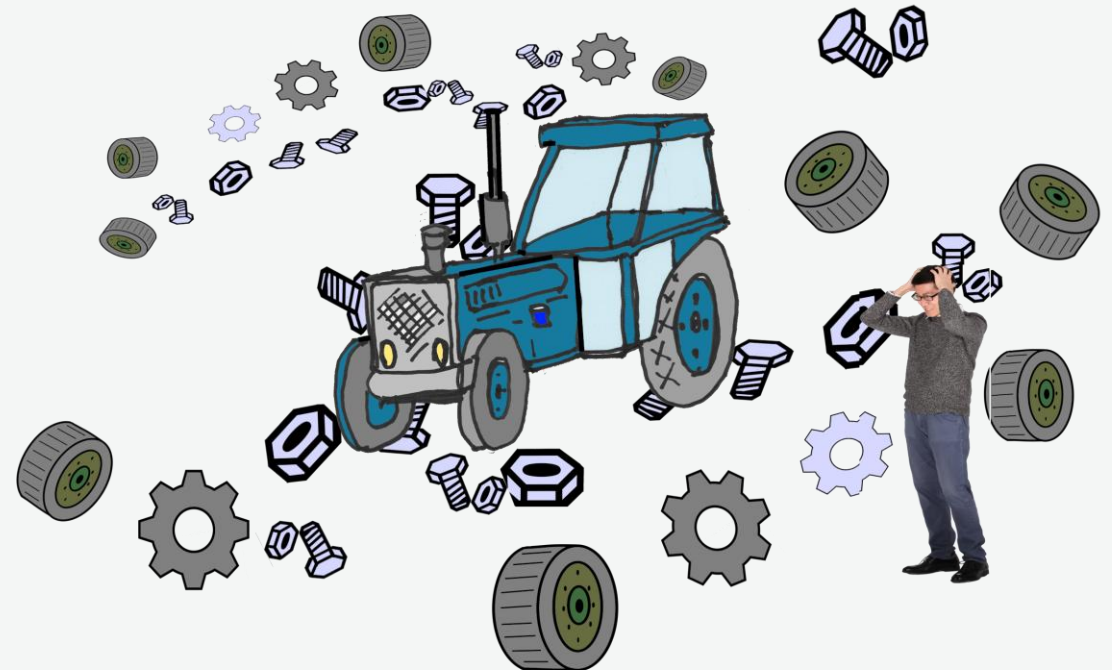

Very often the maintenance work begins...

- wondering and trying to remember where the right documents could be
- which documents are the right ones to this device
- who did and what was done during last maintenance
- have this defect occurred earlier
- do we have some common defects
- do we some potential risks

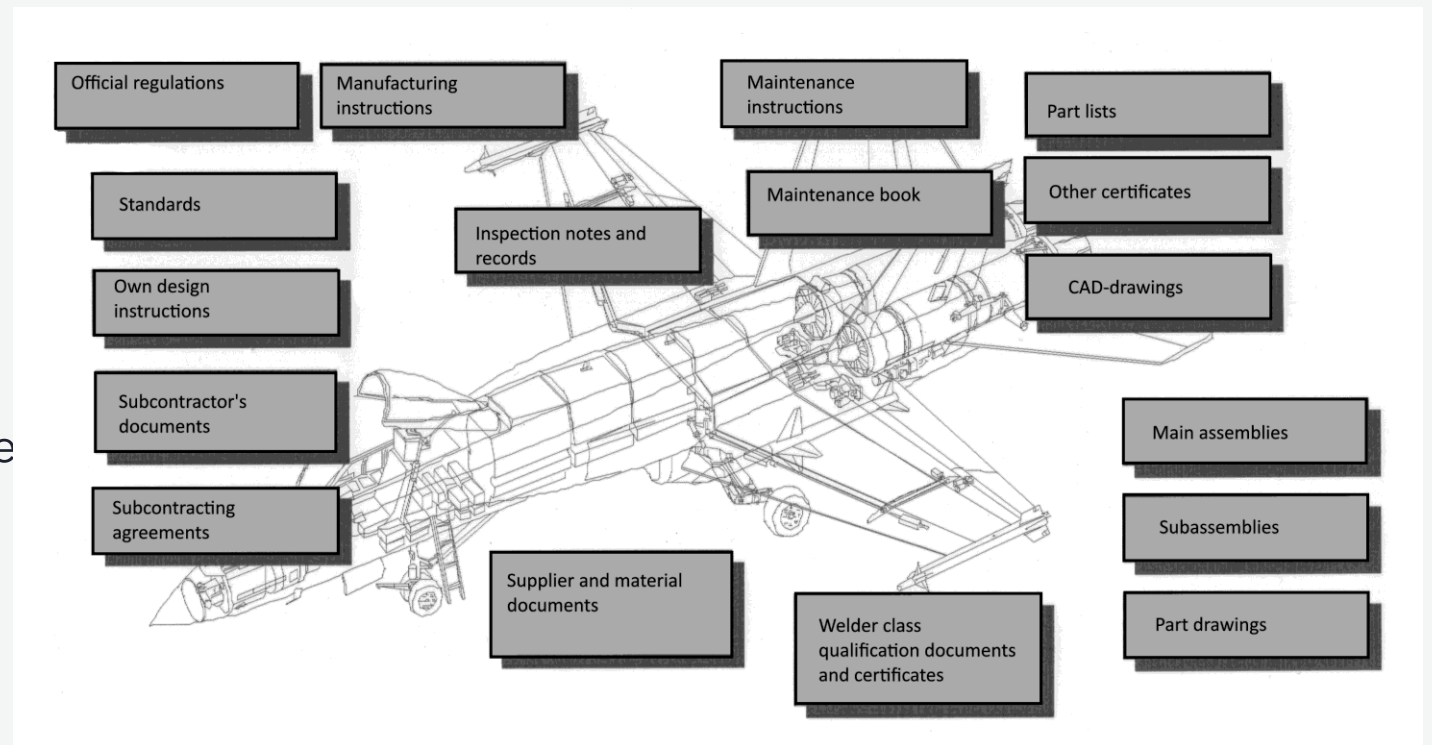

When using JOPI you can

- link information and documents to devices and find it easy
 - search all documents of device
- link information and documents to defects find it easy
 - search all documents of defect
- know whether the defect has occurred earlier
- know the common problems before hand
- use your own native language
(Currently JOPI can be used with 11 languages)

When using JOPI you can

- define documents
 - to be certain type
 - to belong to certain group
 - and class
- find documents based on above and use them everywhere and anytime
 - with laptop
 - with PDA
 - with mobile

Searching takes time and costs... ..using wrong documents costs a lot more

- According to several studies a typical maintenance worker uses 10 to 15% of working time trying to find maintenance documents. In a company 50 worker this one will be 600 k€ to 900 k€ per year. A lot more than what JOPI will cost.
